To Whom It May Concern,

Dr. Jerry Weichman gave a motivational talk to our RSP students at Laguna Beach High School. He was very personable as he related challenges that he faced when he was in High School. He developed a good rapport through humor and sincerity. He held their complete attention.

Dr. Weichman talked about the value of taking charge of ones own life. He gave them specific examples of how to establish and achieve goals. By using his" tool belt" approach the students were given methods to immediately put into practice. The ideas he shared included developing good study habits that would contribute to being more productive in the classroom and with their own homework assignments.

I would definitely recommend Dr. Weichman speak to our entire student body.
